CHICAGO, August 25.—At three o'clock this morning officers Davis and Derig, standing on a sidewalk, in front of entrance Nos. 25 and 27 West Madison street, heard a strange rustling noise up in the hall. Officer Davis stepped up stairs and saw the notorious Dr. Charles C. Earll, abortionist, recently from Joliet, where he served two terms for abortion. Dr. Earll had tools in his hand, and was wiping up something from the floor in front of his door, room No. 10. As soon as he saw the officers, he went into his room, shut the door and locked it. is Hele-wis, hidden wisdom. There is, indeed, another form of Louisa, or rather Louise, which is the feminine of Louis, but this was scarcely heard of before the sixteenth century. The older Heloise form of the name, Aloisa, Aloisia, or Aloysia, was adopted into mediaval English as Alesia—a name which our old genealogists always confuse with Alice. Emily and Amelia are not different forms of one name. Emily is from Emylia, the name of an Etruscan gens. Amelia comes from the Gothic amala—heavenly. Reginald is not derived from Regina, and has nothing to do with a queen. It is Rein-alt—exalted purity. Alice, Adelais, Adelaide, Alisa, Alix, Adeline, are all forms of one name, the root of which is adel—noble. To use the telephone in a thunder storm is sometimes quite dangerous, and the man with the instrument to his ear runs the risk of being plugged on the head with a thunderbolt direct from Jove. Mr. Charles Hill, the present inspector here, while formerly engaged in the same business in Cincinnati, was one day shot in the ear by a stroke of lightning, and has since been deaf in that organ. This accident is likely to occur any day if the proper precautions are not taken by the users of telephones. Every instrument is provided with a safety plug, which, if arranged when the storm begins, effectually cuts the electricity off from the instruments. The damage done yesterday was done to instruments which are in the center of long lines, that have more than the two-end telephones on them. A boy named Willie Carr, who stays in the coal office of James & Co., was engaged in a telephonic conversation with a man at the float on the river when the

Shifting the position of the boat, they dragged a little further to windward and presently the line was caught. With water glasses the men discovered that it had caught in a skeleton, which was held down by a heavy weight. They pulled on the line; something suddenly gave way and up came the skeleton of the trunk, pelvis and leg of a human body, from which almost every vestige of fiesh had disappeared. The husband was a fisherman, and Long Bay channel was a favorite fishing-ground, and he calculated truly enough that the fish would very soon destroy all means of identification, but it never entered his head that as they did so their ravages combined with the process of decomposition, would set free the matter which was to write the traces of his crime on the surface of the water. The case means an exceedingly interesting one; the calm is not mentioned in any book of medical jurisprudence that I have, and the doctore seem not to have had experience of such an occurrence. A diver found a stone with a rope attached, by which the body had been held down, and also portions of the scalp and of the skin of the sole of the foot and of clothing, by means of which the body was identified. The husband was found guilty and executed.
